WHAT'S THE DIFFERENCE?

INDUSTRY

The INDUSTRY™ range is based on the genuine Estelle® Boston range. They are not made by Estelle and do not include the US and European sourced components which feature in Estelle® products, nor do they have a lifetime guarantee. However, they are the best performer of all the imitation hinges we've tested.

Specifying lesser quality products, with limited warranties, thus shorter life spans, is common with high-rise developers, large construction projects and the construction/trade industry in general. Now these products are finding their way into the retail market such as your home. INDUSTRY™ competes at this level.

We ensure the quality of our INDUSTRY™ range is slightly better or on par with any other imitations available in the market for similar prices.
